DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. The species are as follows:

Species I: The embodiments of Figures 1-13 and 21, wherein the pump is of axial piston design.

Species II: The embodiments of Figures 14-16, wherein the pump is of a vane pump design.

Species III: The embodiments of Figures 17-18, wherein the pump is of a radial piston pump design in which pressure is applied on the inside of the pistons.

Species IV: The embodiments of Figures 19-20, wherein the pump is of a radial piston pump design in which pressure is applied on the outside of the pistons.

3. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

4. The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claims 24-41.

Species II: Claims 24 and 42-44.

Species III: Claim 24, 45.
Species IV: Claim 24, 46.

The following claim(s) are generic: None.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species are of completely different designs. The various pump species share noticeably different structure and functionality. These designs are clearly not obvious variants of one another and are therefore independent inventions.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Bertheaud whose telephone number is (571) 272-3476. The examiner can normally be reached on M-F 9am - 5pm.
